Exhaust or Recirculation Units ensures your computer equipment operates within a corrosive free environment, and within the guidelines of major computer and instrument manufacturers' warranties. Equipment Advantages: 1. Self-Contained Exhaust or Recirculation System - Provides particulate and gaseous filtration, removing contaminants generated by in-room sources and those brought in from outside. 2. Target Specific Gases - Multiple banks of media allows system to be configured to handle the contaminant gases present in your environment. 3. System Design Flexibility - Design flexibility to meet your specific needs. 4. Local Service - Trained representatives are supported by laboratory services including environmental corrosion classification and media life analysis testing.
